

Proceedings from
4th International Conference on
Fires in Vehicles – FIVE 2016
October 5-6, 2015
Baltimore, USA

Edited by Petra Andersson and Björn Sundström

TABLE OF CONTENTS

KEYNOTE SPEAKERS

- Progress in Fire Safety Issues for E-Vehicles and the Challenges Ahead 9
Casey C. Grant
Fire Protection Research Foundation, Quincy, MA USA
- New International Standard for Fire Suppression Systems in Buses and Coaches 23
Jonas Brandt
SP Technical Research Institute of Sweden, Borås, Sweden

THE FIRE PROBLEM

- Bus Fires in the United States - Update: Passenger and Driver Evacuation Training 33
Robert A Crescenzo,
Lancer Insurance Company, Long Beach, New York, USA
- Analysis of Fire Protection of UK Buses from 1964 to 2013 39
Virginia Alonso^{1,2} & Guillermo Rein¹
¹*Imperial College London, UK*
²*AECOM Fire, London, UK*
- Experimental Analysis of Human Evacuation From Bus Fire 49
Hung-Chieh Chung^{1,2}, Nobuyoshi Kawabata³, Miho Seike^{3,4}, Masato Hasegawa³, Shen-Wen Chien⁵ and Keiichiro Orito²
¹*Kaohsiung City Fire Bureau, Taiwan (R.O.C.)*
²*Kanazawa University, Graduate School of Natural Science & Technology, Japan*
³*Kanazawa University, Faculty of Mechanical Engineering, Institute of Science and Engineering, Japan*
⁴*National Science and Technology Center for Disaster Reduction, Department of Earthquakes and manmade disaster, Taiwan (R.O.C.)*
⁵*Central Police University, Department of Fire Science, Taiwan (R.O.C.)*
- Fire Behaviour of Gas Spring Used in Cars 61
Mathieu Suzanne¹, Aurélien Thiry¹, Hervé Bazin¹, Claire Petit-Boulanger², Didier Varieras² & Jacques Faure²
¹*Laboratoire Central de la Préfecture de Police, Paris, France*
²*Groupe Renault, Guyancourt, France*
- Statistical Analysis, a Need to Reach an Optimised Risk Management in Car Parks 73
Dorian Thouroude, Eric Guillaume, Daniel Joyeux & Olivier Lecoq-Jammes
Efectis France, Espace Technologique, Saint Aubin, France

ALTERNATIVE FUEL VEHICLES

- Analysis of Energy Release during Thermally-induced Failure of Lithium Ion Batteries: Implications for Vehicle Fire Safety 83
Xuan Liu, Zhibo Wu & Stanislav I. Stolarov
Department of Fire Protection Engineering, University of Maryland, MD, USA

Full-Scale Fire Testing of Electric and Internal Combustion Engine Vehicles <i>Cecilia Lam¹, Dean MacNeil¹, Ryan Kroeker¹, Gary Lougheed¹ & Ghislain Lalime²</i> <i>¹National Research Council Canada, Ottawa, Ontario, Canada</i> <i>²Transport Canada, Ottawa, Ontario, Canada</i>	95
--	----

Investigation of a LPG Tank Rupture During a Car Fire <i>Markus Egelhaaf, Martin Hitzemann & Dieter Wolpert</i> <i>DEKRA Automobil GmbH, Stuttgart, Germany</i>	107
---	-----

FIRE DEVELOPMENT

Design Fires for Railway and Metro Tunnels <i>Xavier Ponticq & Joël Guivarc'h</i> <i>CETU (French Tunnels Design Centre), Bron, France</i>	117
--	-----

Design Fires in Swedish Railway Tunnels – How are Research Results Implemented and What are We Missing? <i>Niclas Åhnberg, Axel Jönsson</i> <i>Brandskyddslaget, Sweden</i>	127
---	-----

FIRE SAFETY

Fire Safety Assessment in Europe – Process of Approval <i>Miriam Jost</i> <i>TÜV SÜD Rail GmbH, Germany</i>	139
---	-----

Passenger Locomotive Fuel Tank Integrity Research <i>Karina Jacobsen¹, Michael Carolan¹ & Melissa Shurland²</i> <i>¹US Department of Transportation – Volpe Center, Cambridge, MA, USA</i> <i>²US Department of Transportation - Federal Railroad Administration, Washington, D.C., USA</i>	147
---	-----

Heavy Truck Fireworthiness under Impact Conditions <i>Keith Friedman & R. Rhoads Stephenson</i> <i>Friedman Research Corporation, Austin, Texas, USA</i>	161
--	-----

FIRE INVESTIGATIONS

Case Study of Recent Accidents Investigated by the NTSB <i>Joseph Panagiotou & Joseph Kolly</i> <i>National Transportation Safety Board, USA</i>	171
--	-----

A Case Study on the Use of Reverse FMEA (rFMEA) and the Scientific Method in a Fire Cause Determination <i>Kerry D. Parrott & Douglas R. Stahl, PE</i> <i>Stahl Engineering & Failure Analysis, LLC, Fort Wayne, Indiana, USA</i>	183
---	-----

Detecting Leaks in Commercial Vehicles Fueled by Natural Gas & Propane <i>Quon Kwan</i> <i>Federal Motor Carrier Safety Administration, United States Department of Transportation, Washington, DC, USA</i>	193
---	-----

FIRE PROTECTION

- Fire Protection of Military Ground Vehicles and their Crews 197
Steven E. Hodges¹, & Steven J. McCormick²
¹*Alion Science and Technology, Santa Barbara, CA, USA*
²*Army TARDEC Ground System Survivability, Warren, MI, USA*
- New Test Method for Fire Detectors in the Engine Compartment of Heavy Vehicles 209
Ola Willstrand, Jonas Brandt & Peter Karlsson
SP Technical Research Institute of Sweden, Borås, Sweden
- The Development of FM Approval Standard 5970 Protection Systems for Heavy Duty Mobile Equipment 219
Armand V. Brandao & Hong-Zeng Yu
FM Approvals & FM Research, Norwood MA, USA
- Motorcoach Fire Safety Evaluation – Fire Hardening 231
Jason Huczek
Southwest Research Institute (SwRI), USA

POSTERS

- Fire Risks of Electrical Vehicles in Underground Car Parks 243
Andreas Gagnat Bøe & Nina Kristine Reitan,
SP Fire Research AS, Norway
- Fire Cause Determination Method of Motor Vehicle 247
Peng Gao, Lifen Wang & Shiqun Yang
Sichuan Fire Research Institute of Ministry of Public Security, China
- Qualitative Risk Analysis of Dangerous Goods with Alternative Propellants 251
Jonatan Gehandler, Henry Persson & Anders Lönnemark
SP Technical Research Institute of Sweden, Borås, Sweden
- Gas Emissions from Lithium-Ion Battery Cells Undergoing Abuse from External Fire 253
Fredrik Larsson^{1,2}, Petra Andersson¹, Per Blomqvist¹ and Bengt-Erik Mellander²
¹*SP Technical Research Institute of Sweden, Borås, Sweden*
³*Department of Physics, Chalmers University of Technology, Göteborg, Sweden*
- KISS the Fire 257
Tim Melton
Firetrace Limited, Ipswich, United Kingdom
- U.S. Motorcoach and School Bus Fire Safety Analysis 261
Neil Meltzer, Lauren Beaven, Nelson Canas, Nadeem Istfan, and Britt Phillips
John A. Volpe National Transportation Systems Center, Cambridge, Massachusetts, USA
- Post-Collision Fires in Road Vehicles, a Pre-Study 265
Fabienne Roux¹, Raúl Ochoterena¹, Anna Sandinge¹, Christoffer Nylander², Mats Lindkvist³, Ulf Björnstig³ and Mikael Skrifvars⁴
¹*SP Sveriges Tekniska Forskningsinstitut, Borås, Sweden*
²*Consilium Marine & Safety AB, Göteborg, Sweden*
³*Umeå Universitet, Umeå, Sweden*
⁴*Borås Högskola, Borås, Sweden*

Discrimination of Short-Circuit Molten Marks on Steel Plates and Electrical Wiring in
Determining Cause of Automobile Fires

269

Yohsuke Tamura

Japan Automobile Research Institute, Osaka, Japan
