

Proceedings from
2nd International Conference on
Fires in Vehicles – FIVE 2012
September 27-28, 2012
Chicago, USA

Edited by Petra Andersson and Björn Sundström

TABLE OF CONTENTS

KEYNOTE SPEAKERS

Bus Fires in the United States: Statistics, Causes and Prevention <i>Robert A. Crescenzo, Lancer Insurance Company, USA</i>	9
Historical Fires and their Impact on Regulations and Research <i>Petra Andersson and Björn Sundström, SP Technical Research Institute of Sweden, Sweden</i>	17
Fire Protection Strategies for Lithium Ion Batteries: a Status Update from the Fire Protection Research Foundation <i>Kathleen H. Almand, Fire Protection Research Foundation, USA</i>	29
Fire Suppression Systems in Buses and Coaches – How, Where and Why <i>Joseph (Joey) Peoples, Kidde Technologies, USA</i>	37

INCIDENT AND CASE STUDIES

Motorcoach Fire Investigation and Wheel Well Fire Testing <i>Joseph Panagiotou, National Transportation Safety Board, USA</i>	47
Motorcoach Tire Fires – Passenger Compartment Penetration, Tenability, Mitigation, and Material Performance <i>Erik L. Johnsson & Jiann C. Yang, National Institute of Standards and Technology, USA</i>	59
Examples of Bus Fire Investigations <i>Dieter Wolpert & Markus Egelhaaf, DEKRA Automobil GmbH, Germany</i>	71
Commercial Vehicle Fire, Cause and Origin Analysis <i>Christopher W. Ferrone, Americoach Systems, Inc., USA</i>	83

FIRE STATISTICS

Automobile Fires in the U.S.: 2006-2010 Estimates <i>Marty Ahrens, National Fire Protection Association, USA</i>	95
Bus Fires in 2010-2011 in Finland <i>Esa Kokki, Emergency Services College, Finland</i>	105
Motorcoach Fire Safety Analysis: The Causes, Frequency, and Severity of Motorcoach Fires in the United States <i>Neil R. Meltzer, Gregory Ayres & Minh Truong, John A. Volpe National Transportation Systems Center, USA</i>	111
Risk of Commercial Truck Fires in the United States: An Exploratory Data Analysis <i>Jonathan Pearlman & Neil Meltzer, John A. Volpe National Transportation Systems Center, USA</i>	123

FIRE DEVELOPMENT

- Methodology of Fire Growth and Toxic Gases Production Simulation - Application to an European Train Vehicle 133
A. Camillo, T. Rogaumeb, E. Guillaumea, D. Marquisa, Laboratoire National de Métrologie et d'Essais (LNE), France
- Fire Safety Performance of Buses 147
Anja Hofmann & Steffen Dülsen, BAM Federal Institute for Materials Research and Testing, Germany
- Model Scale Metro Carriage Fire Tests – Influence of Material and Fire Load 159
Anders Lönnermark, Johan Lindström, Ying Zhen Li, SP Technical Research Institute of Sweden, Sweden
- Quantification of Rapid Transit Vehicle Design Fire Heat Release Rates 171
*James McBryde, Andrew Coles and Keith Calder, Sereca Fire Consulting Ltd, Canada
 Harold Locke, Locke & Locke Inc., Canada*

ALTERNATIVE FUELS

- Comparison of the Fire Consequences of an Electric Vehicle and an Internal Combustion Engine Vehicle. 183
Amandine Lecocq, Marie Bertana, Benjamin Truchot and Guy Marlair, INERIS – National Institute of Industrial Environment and Risks, France
- Comparison of Fire Behaviors of an Electric-Battery-Powered Vehicle and Gasoline-Powered Vehicle in a Real-Scale Fire Test 195
*Norimichi Watanabe, National Research Institute of Police Science, Japan,
 Osami Sugawa, Tokyo University of Science, Japan,
 Tadahiro Suwa, Saitama Prefecture Police, Japan,
 Yoshio Ogawa, National Research Institute of Fire and Disaster, Japan,
 Muneyuki Hiramatsu, Hino Tomonori, Hiroki Miyamoto, Katsuhiro Okamoto and Masakatsu Honma, National Research Institute of Police Science, Japan*
- National Electric/Hybrid Vehicle Training Programs for First Responders 207
Andrew H. Klock, National Fire Protection Association, USA
- Determining Hydrogen Concentration in a Vehicle after a Collision Test 213
*Yohsuke Tamura, Noriaki Ohtsuka, Masayuki Takeuchi and Hiroyuki Mitsuishi, Japan
 Automobile Research Institute, Japan*

REGULATIONS AND STANDARDS

- Comparison of the U.S. and European Approaches to Passenger Train Fire Safety 223
*Stephanie H. Markos, John A. Volpe National Transportation Systems Center, USA
 Melissa Shurland, Federal Railroad Administration, USA*
- New International Test Method for Fire Suppression Systems in Bus and Coach Engine Compartments 235
Jonas Brandt and Michael Försth, SP Technical Research Institute of Sweden, Sweden

DETECTION AND SUPPRESSION

The Cost Effectiveness of On-Board Train Fire Suppression Systems in Underground Rail Transit Systems 245

William D. Kennedy, Tora Fuster & John Swanson, Parsons Brinckerhoff, U.S.A.

A Comparison of Various Fire Detection Methodologies in Transit Vehicle Fire Protection Systems 257

*Paul Smith & Adam Chattaway, Kidde Graviner Ltd, UK
Joseph (Joey) Peoples, Kidde Aerospace and Defense, USA*

POSTERS

Developing a Fire Resistance Test for Vehicles with Rechargeable Energy Storage Systems 269

Petra Andersson and Magnus Bobert, SP Technical Research Institute of Sweden, Sweden

Extreme Duty Fire Products Improve Vehicle Protection. 273

Richard J Barone, TPR2 - Thermal Product Research, USA

Achieving Higher Fire Safety in Vehicles: the Potential of Phosphorus, Inorganic and Nitrogen Flame Retardants 277

*Dr. Adrian Beard, Clariant Produkte (Deutschland) GmbH, Germany,
Jérôme De Boysère, Thor GmbH, Germany
Dr. Michael Klimes, Nabaltec AG, Germany*

The Development of a Standard Test for Assessing the Effectiveness of Transit Vehicle Fire Extinguishing Systems 281

*Adam Chattaway, Robert Dunster and Paul Weller, Kidde Graviner Ltd, UK
Joseph (Joey) Peoples, Kidde Aerospace & Defense, USA*

Effectiveness of Shielding Vehicle Hot Surfaces 285

*Cam J. Cope, Auto Fire & Safety Consultants, Inc., USA
John M. Stilson, Stilson Consulting, USA*

Protecting Automotive Cooling Fan Modules from Damage Caused by Thermal Runaway 287

Faraz Hasan, TE Circuit Protection, USA

Fires in Rolling Stock – Testing and Validation 291

Michael Klinger & Stefan Kratzmeir, IFAB – Institute for applied fire safety research, Germany

The Key to Suppression is Detection 295

Scott Starr & Angela Krccmar, Firetrace International, LLC., USA

Fire Safety Improvement of Vehicles 299

Susan D. Landry, Albemarle Corporation, USA

Energy Storage System Safety in Electrified Vehicles 303

*Fredrik Larsson, SP Technical Research Institute of Sweden, Sweden and Chalmers University of Technology, Sweden
Bengt-Erik Mellander, Chalmers University of Technology, Sweden*

Total Fire Protection Solutions for Road and Railway Vehicles. <i>Klas Nylander, Consilium Marine & Safety, Sweden</i>	307
Parking Brake Fires in Commercial Vehicles <i>Kerry D. Parrott & Douglas R. Stahl, Stahl Engineering & Failure Analysis, USA</i>	311
Experimental Characterization of Automotive Materials in a Tunnel Fire <i>Xavier Ponticq, CETU, France</i>	315
Shall We Consider New Design Fire Scenarios in Tunnel Fires Studies to Take Account of Fast Development of Electro Mobility? <i>Benjamin Truchot and Guy Marlair, INERIS, France</i>	319
